“Have nothing in your house that you do not know to be useful, or believe to be beautiful.”

WILLIAM MORRIS (1834-1896)
BRITISH CRAFTSMAN, DESIGNER & POET

EVERHOT

Setting the standard for range cookers

An Everhot combines craftsmanship, quality and the best of British engineering. Honing every detail for 45 years has resulted in our cookers being beautiful, highly efficient and functional.

VERSATILE WARMTH

Whilst an Everhot range cooker is designed to remain switched on and up to temperature 24 hours a day, it is easy to independently control its hot plates and ovens to suit your cooking needs and the time of year. You can even turn off a hot plate or oven during warmer months. An Everhot uses less than half the energy of other comparable range cookers with an overnight ECO mode giving you further savings.

LIVING WITH AN EVERHOT

The kettle is always poised to make a cup of tea, the cakes are evenly baked, the roast potatoes crispy and the family can warm their hands while the dog warms its paws. The powerful Grill in each model is an added bonus. An Everhot never goes unnoticed and becomes the hub of everyday life, replacing many household gadgets including the toaster and kettle, and even the tumble dryer. It's a helping hand in the kitchen and that's why we say an Everhot is one of the family.

ENGINEERING EXCELLENCE

Electric range cookers are easier to install and tend to be more efficient and reliable than oil or gas fired ranges – with Everhot leading the way. The genius of an Everhot's design is that it uses a trickle feed of electricity and its peak demand is a fraction of other electric range cookers. From conception in the 1970s, Everhot cookers were designed to work with renewables and simply run off a standard 13amp plug with no need for an annual service. All our cookers are handmade in our carbon negative factory in Gloucestershire.

COALEY MILL

Four decades of heritage and innovation

The first Everhot was invented 45 years ago at thirteenth-century Coaley Mill, which is still home to our showroom and head office today. The millpond is a wildlife haven, providing a home to otters, kingfishers, swans and dippers. The village of Coaley lies at the foothills of the Cotswolds in Gloucestershire and our factory is just a couple of miles away.

In the mid 1970s inventor and engineer, Ossie Goring, was concerned by how much energy his heat storage cooker was using and, living at a water mill, he decided to set about creating an environmentally-friendly heat storage electric range cooker which could run off the water turbine he had installed.

A few years and many prototypes later, Ossie had perfected a 'trickle-feed' design, which allowed his new cooker to be powered by the small intermittent flow of electricity provided by the mill's turbine. To this day, an Everhot's peak electricity demand is a fraction of that needed by other range cookers.

Ossie's breakthrough not only enabled the first Everhot to run off his water turbine, but also a standard 13amp plug.

For the last 30 years Ossie's son, Guy Goring – also an engineer – has continued to ensure that our cookers set the pace in terms of innovation, efficiency, design and functionality and he has built the business into a real British engineering success story. Sustainability remains deeply embedded in our DNA and we never stop trying to find ways to improve our cookers' efficiency.

ENVIRONMENT

We are green

A desire to conserve energy has been at the heart of our philosophy ever since it inspired the invention of the first Everhot. The range cookers themselves remain our biggest focus, and we are continually searching for ways to make them even more efficient and more compatible with renewable energy.

Everhot also believes in local manufacturing. To this end, all of our cookers are assembled in Gloucestershire from parts that are almost exclusively sourced from the UK using energy that we largely generate ourselves.

The 25kW water turbine which brought our first cooker to life in 1979, still powers our head office. It is now supplemented by a heat pump and solar panels on our showroom. Our factory is a BREEAM (Building Research Establishment Environmental Assessment Method) 'Excellent' rated building which has been further enhanced with the fitting of a 250kW solar array,

along with battery storage, to ensure we continue to generate the majority of the power that we use.

It is an ethos mirrored by many of our Everhot owners. If you already have solar panels, or are thinking of installing them, we are the range cooker brand to choose. An Everhot cooker requires a trickle feed supply which closely matches how solar power is generated. Your Everhot can 'wake up' as the sun rises and go into 'sleep' ECO mode as the sun sets. Most of our range cookers draw a maximum of 3kW, and an average of 600W, which means they won't exhaust a solar system's capabilities.

REWILDING

Bees and trees

In addition to generating our own power, over the last 45 years we have planted 50,000 trees across three rewilding sites which lie within a mile of our head office and factory.

To increase the ecological diversity at each site, we have also planted wildflower meadows, dug wildlife ponds and, most recently, welcomed 200,000 honey bees in four hives.

In 2022, we became proud corporate partners of Gloucestershire Wildlife Trust which helps to protect more than 1,000 hectares of the county's wild spaces. Including Coaley Peak, which looks down onto Everhot's headquarters.

"We realised years ago that accidentally, as a result of the hydro, solar power, heat pumps and tree planting we had done here, we had always been a carbon negative company and therefore the logical decision was to maintain that status as we grew. Today it's called rewilding but it's basically a larger version of what we've always done for our own joy - it just happens to serve a happy dual purpose nowadays." - Guy Goring.

“The feeling of seeing how quickly and effectively nature recovers when given a chance becomes addictive.”

GUY GORING
MANAGING DIRECTOR

CRAFTSMANSHIP

Traditional and modern techniques

Each Everhot is assembled by a single technician, whose skills are essential to the cooker's performance and appearance. In every cooker we make, you will find the technician's name on the inside of the control panel door.

With today's disposable culture it is now unusual to work with steel as thick as the components we use to build an Everhot. Each cooker door is carefully ground by hand – taking it from a rough casting to a smooth finish ready for two ground coats of primer before the finished colour is applied.

The counter-weighted lids go through a similar process of hand-finishing and graining. Once finished, the doors and lids are paired with the rest of the cooker which is

assembled by hand. Each piece of insulation is hand cut to size, then rope seals, hinge block caps, handles, magnetic door catches and the control panel are all installed.

An Everhot's journey through quality control involves a 12-hour running-in period to ensure everything is working correctly before it is cooled and painstakingly cleaned and packaged for delivery. An Everhot truly is built to last a lifetime.

Reasons to choose an Everhot

Our range cookers are available in 7 sizes, with a wide choice of models and colours to choose from. We aim to provide the perfect Everhot for any style of kitchen and size of household.

Efficiency and sustainability

For most people energy conservation is very important – for environmental reasons as well as saving on energy bills. Our cookers are highly efficient and use a fraction of the energy that other heat storage range cookers consume. They are built to last a lifetime in a carbon negative factory, using virtually all British parts.

Lower running costs

As well as enjoying lower energy bills an Everhot doesn't require annual servicing. An Everhot's compatibility with renewables is also leagues ahead of any other range cooker. Many of our customers use them in conjunction with a domestic solar installation.

Easy installation

An Everhot is easy to install. Although we prefer to take care of the delivery and fitting of all our cookers, they require no flues or complicated pipework – they just plug in. If you would like your Everhot to go in a kitchen island, that's no problem.

Engineering excellence

Everhot is a family-run company and engineering and craftsmanship runs in our blood. We use whatever traditional or modern techniques lead to the best result and, in our book, that means creating a cooker that's built to last a lifetime.

Everything a cook needs

Everhot ovens are amongst the largest of any heat storage cooker. Nestling in the top of every main oven is a powerful full width grill. With the option of induction hobs to accompany the cast iron hot plates, an Everhot is all the cooker you could wish for.

Control and versatility

An Everhot is the focal point of any kitchen and designed to be left on at cooking temperatures providing gentle background heat. Each oven can be controlled individually giving precise temperature control. The hot plate is also controllable and with the option of an induction hob you'll never need a separate hob or oven in the kitchen.

Warmth

An Everhot is a cooker for all seasons. In summer, it's easy to reduce the heat output of an Everhot's hot plate and ovens, either independently or together – depending on what you need to cook. There is the programmable 'ECO' mode for the warmer months and holidays, which automatically reduces the temperature when not in use. Everhots are designed to be left on at other times – providing a constant and comforting background warmth, perfect for airing clothes and keeping your kitchen cosy.

Why Electricity?

From the day we started 45 years ago, and long before it was considered important, the conservation of energy has been a guiding principle, and it remains just as essential today.

Renewable energy integration

Electricity is the perfect choice and has enabled us to develop exceptionally efficient ranges that can be powered by both the national grid or by small scale solar, wind or hydro installations. Our unique 'trickle feed' design allows our models to run on standard 13amp plugs, minimising electrical load and easing installation. You can read more about our customers using solar panels with their cookers on the Everhot website.

ECO control

Designed to cut running costs and keep your kitchen cool in the summer, the ECO control provides a type of 'sleep' facility that allows an Everhot to drop to a lower power setting and incorporates our oven delay feature, which is perfect for customers who don't need hot ovens in the morning, allowing you to stagger the heat up times of the hot plates and ovens by up to 12 hours.

The ECO function can be controlled automatically via a simple timer control. We estimate the savings through regular overnight use to be around 20% of overall running costs.

When in ECO mode, an Everhot will have a maximum requirement of 2kW, which is great for anyone using renewable energy.

Choosing i or +

All Everhots have cast iron hotplates. Some models have either an additional cast iron simmer plate (+) or an induction hob (i).

Why choose induction?

Induction hobs are incredibly efficient and hence cheaper to run, compared to gas or ceramic hobs. They work by using a magnetic field, coming from under the glass top, to heat up the metal pan rather than the cooking surface.

Induction offers precise temperature control and is the safest and quickest method of cooking on a hob.

All Everhots have cast iron hot and simmer plates, but with most models there is also the option of an additional induction hob. This provides a really fast way to bring a pan of water to the boil at any time, even in summer when you may have turned the temperature of your cooker down.

Two zone induction hob
incorporated into the
Everhot 90i, 100i, 110i
and 160i models.

Everhot 60 in Mustard

THE 60 SERIES

The natural choice for smaller kitchens

Our first model was an immediate success when it was launched 40 years ago. The Everhot 60 has an enduring and broad appeal which is especially popular for homes where space is at a premium.

Being so compact you might expect some compromise, but nothing could be further from the truth. Yes it's small, but it's also perfectly formed, and it comes packed with features you wouldn't expect from a traditional heat storage range cooker, including our ECO control.

With its two full-size ovens, cast iron hot and simmer plates and integral grill, the Everhot 60 has more capacity than many of its larger competitors.

Everhot 60 in White

Everhot 60 in Sage

Everhot 60

Town or country, this is the perfect choice for the smaller kitchen since the 600mm width will fit a standard 600mm wide cooker space. Installation is incredibly straightforward since neither flue nor reinforced floor is needed and it simply plugs into a 13 amp socket, keeping any disruption to a minimum.

Everhot 60 Dimensions

See specification & price sheet or visit www.everhot.co.uk for full details.

The Everhot 60 has a stainless steel digital control box which is typically positioned in an adjacent cupboard.

THE 90 SERIES

A contemporary classic

The Everhot 90 series is elegantly proportioned and beautifully designed for the modern kitchen. With two cavernous ovens (roasting, baking or slow cooking) and cast iron hot and simmer plates, the 90 series is a perfect choice for families of all sizes.

You have two options to choose from: the Everhot 90+ or Everhot 90i. The 900mm width makes these cookers the ideal replacement for traditional ranges, often built to this size. The easy to use controls are accessed from behind the small cast iron door on the front of the cooker.

Everhot 90i with matching Everhot Hood by Westin in Graphite

Everhot 90i in Dusky Blue

EVERHOT 90+

The Everhot 90+ benefits from an additional cast iron simmer plate conveniently located under a second stainless steel lid. This gives the cooker a beautifully balanced look and provides useful additional cooking space. If you decide that you do not need the second simmer plate switched on continuously, it is a simple task to switch it back on when you need it.

EVERHOT 90i

The Everhot 90i has an integral two zone induction hob, neatly fitted under the right hand lid. The induction hob offers you extra capacity at any time and a fantastic solution for those summer days when you simply don't want heat in the kitchen. Induction is unrivalled in terms of control, speed and efficiency.

Everhot 90+ and 90i Dimensions

Everhot 90+

Everhot 90i

See specification & price sheet or visit www.everhot.co.uk for full details.

THE 100 SERIES

The beautiful family range

There's much to love about the beautifully engineered and elegant Everhot 100 Series, and you have two options to choose from: the Everhot 100+ or Everhot 100i.

The attractive and balanced four cast iron door configuration conceals one oven for roasting, another for baking or casseroles, while the third is a useful plate warming oven. The fourth door reveals the controls. Under the easy lift lids are large hot and simmer plates, and the powerful grill located at the top of the main oven provides a great way to cook healthy meals, and can also be used to boost the oven temperature quickly.

EVERHOT 100+

The Everhot 100+ has a useful additional cast iron simmer plate concealed under the right hand lid. On a day-to-day basis, you may choose to leave it switched off, but for the occasional day when you have a houseful, or if your kitchen needs extra heat throughout the winter months, it will be invaluable. The warming oven on this model is behind the top right door.

EVERHOT 100i

The Everhot 100i is equipped with a two zone induction hob, fitted neatly under the second lid. With fingertip controls and incredible speed and control, it is an essential modern addition to your classic range cooker. The warming oven on this model is behind the bottom right door.

Everhot 100+ and 100i Dimensions

See specification & price sheet or visit www.everhot.co.uk for full details.

Everhot 100i in Dove Grey

THE 110 SERIES

An accomplished cooker

The Everhot 110 series has three full size ovens providing significantly more cooking space compared to the Everhot 100 and is specifically designed to fit into a 110cm space.

There are two options to choose from: the Everhot 110+ or Everhot 110i. Behind the beautiful cast iron doors you'll find capacious ovens for roasting, baking and slow cooking, and the easy-lift lids conceal good sized hot plates too. The Everhot 110 is a highly accomplished cooker which will immediately enhance any new kitchen or existing kitchen space.

Everhot 110i in Teal

Everhot 110i in Black

Everhot 110+ in Black

EVERHOT 110+

The Everhot 110+ offers the classic configuration of cast iron hot and simmer plates under separate lids, both of which are independently controllable. In addition, this cooker has three ovens; ideal for those customers who want to have a roasting, baking and slow cooking setup. The fourth door provides access to the controls of the cooker.

EVERHOT 110i

The Everhot 110i offers a fascinating hybrid of classic cast iron hotplate cooking, whilst providing the latest in induction technology with its two zone hob – ideal to increase the overall hotplate space or to provide a useful facility during the summer months. This cooker also benefits from three full size controllable ovens.

Everhot 110+ and 110i Dimensions

See specification & price sheet or visit www.everhot.co.uk for full details.

Everhot 120i in White

THE 120 SERIES

A genuine thoroughbred

The Everhot 120 series provides an exceptional choice of cooking options and is perfect for family cooking and larger kitchen spaces. There are two options to choose from: the Everhot 120+ or Everhot 120i.

This classic thoroughbred performs superbly, providing both versatile cooking capacity and kitchen warmth. Beautifully elegant and balanced, this appliance has the poise to grace any kitchen, modern or classical.

Everhot 120i in Tangerine

Everhot 120i in Mushroom

Everhot 120i in Mushroom

EVERHOT 120+

The Everhot 120+ lets you enjoy the luxury of four ovens and four cast iron hotplates (each being independently adjustable for maximum versatility). So you can have cakes in one oven, roast vegetables in another, a joint in the third and plates warming in the fourth - all at different temperatures. On the hotplates, a sauce simmering gently, peas boiling on another and loads more hotplate space to spare. Each of the large top ovens has an integral grill.

As with the Everhot 60 the control boxes are external and can be conveniently situated in adjacent kitchen units (or on the worktop). This is the ideal cooker for those who require more heat in their kitchen.

EVERHOT 120i

The Everhot 120i provides you with three ovens - on the left you'll find the roasting and baking ovens, and on the right a slow cooking oven for when you have a houseful. With the 120i the final door conceals all the controls necessary to run the cooker. In addition to the classic cast iron hot and simmer plates, the 120i incorporates a fantastic three zone induction hob, perfect for hot summer days or to augment the overall cooking area.

Everhot 120+ and 120i Dimensions

See specification & price sheet or visit www.everhot.co.uk for full details.

Everhot 150i in Marine Blue

THE 150 SERIES

A true focal point

An Everhot 150 has the presence and classic lines to complement the grandest of kitchens – representing a brilliant and versatile step up from the Everhot 120 series.

There are two options to choose from: the Everhot 150+ or Everhot 150i. Whether entertaining with friends or cooking large meals for the whole family, the Everhot 150 is a cooker that has the sophistication and capability to master the situation. Unlike most other large range cookers, each oven or hot plate can be easily adjusted to suit your cooking needs perfectly as well as seasonal heating requirements.

Everhot 150i in Burgundy

Everhot 150+

The Everhot 150+ has four large ovens and a wealth of cast iron hotplate capacity, as well as two grills, integral controls and a useful resting plate positioned between the hotplates. As with the Everhot 120, this is the ideal cooker for those who require more heat in their kitchen.

Everhot 150i

Offering the height of technology and classic design, the Everhot 150i has three independently controlled ovens (roasting, baking and slow cooking), an additional plate warming oven, cast iron hot and simmer plates and a three-zone induction hob. The controls for the Everhot 150i hide neatly behind the centre door, whilst a touch-screen induction hob is revealed underneath the right hand lid. The range delivers real presence into your kitchen and its combination of traditional cast iron plates and high-tech induction was a ground-breaking development by Everhot. The state-of-the-art induction hob matches all our requirements for both reliability and performance.

Everhot 150 and 150i Dimensions

See specification & price sheet or visit
www.everhot.co.uk for full details.

THE 160 SERIES

The Masterpiece of the Everhot range

Able to contend with big families, big appetites and even bigger entertaining, the Everhot 160i is the latest and largest of our heat storage range cookers. Our biggest ever cooker brings focal warmth to the grandest of kitchens and will satisfy the busiest and most ambitious of home cooks.

The 160i is an awe-inspiring powerhouse of cooking versatility, featuring an industry leading number of options for cooking, baking and grilling. But its size doesn't detract from its elegance. The latest addition to our collection emulates the classic Everhot style combined with energy efficiency from British manufacturing.

Everhot 160i in Cream

Everhot 160i in Forest Green

Everhot 160i in White

Everhot 160i

Never fear Christmas dinner preparation again. Each of the ovens, hot plates and induction zones on the 160i are independently temperature adjustable. Reaching up to 250 degrees in the top ovens and housing two powerful grills, the 160i gives you the capability to slow cook, simmer, bake and roast at the same time. Behind the middle fifth door, you will find all of the easy to adjust controls.

Sitting above the ovens are our traditional temperature-controlled double simmer and hot plates either side of a state-of-the-art, two-zone induction hob. All in all, capable of managing up to ten pots or pans on the go at once. The Everhot 160i is an opulent, attention-grabbing centrepiece that brings warmth and luxurious style to your kitchen.

Everhot 160i Dimensions

See specification & price sheet or visit www.everhot.co.uk for full details.

THE PROFESSIONALS' CHOICE

Endorsed by chefs and interior designers alike

Sarah Beeny is one of the nation's best loved property experts. Having undertaken many projects before, her most recent challenge was her own home which became the focus of a Channel 4 series entitled Sarah Beeny's New Life in the Country.

"It started with a friend telling me how brilliant their Everhot was. It was helped by the fact that I really like the design of the square lids. Ultimately though the controllability and fact that it uses considerably less electricity to run than alternatives.

"I love that I learn more every time I use it. It is so very controllable, which is brilliant when you run a big family. I have to admit that there are quite often wellies upside down or football boots also drying on it. There is also someone generally sitting on it as it's a joy to hang around on and is definitely the heart of our kitchen. It really suited us to have a warm kitchen with a single source of constant heat - that is why we chose the Everhot. Without the Everhot in the kitchen, the whole plan would have been flawed."

Sarah Beeny, Property Expert and TV Presenter.

Nigel Haworth was born in Whalley, Lancashire, where his food roots remain to this day. He gained his first Michelin star in 1996 and has become a popular presence on TV with appearances on shows including Masterchef, Great British Menu and Saturday Kitchen.

"An Everhot is a gleaming beast of a cooker. The excellence of the craftsmanship is clear to see, what more could you ask for as a lover of quality British produce?"

"The Everhot is so much more to the family than a cooker, it brings warmth to our farmhouse kitchen and we usually have a daily battle with the dog to get anywhere near it. The solidity and practicality of the Everhot Cooker is second to none and I hope you will enjoy your Everhot cooker as much as I do, it makes cooking a daily joy."

Nigel Haworth, Michelin Star Chef and winner of Great British Menu 2009.

OPTIONAL CHROME PACK

In order to give the cooker an aesthetic twist, we are also offering the option of a chrome pack. Chrome has long been seen as the epitome of the classic British sports car and indeed our chrome is applied in the same Midlands based factory that still supplies some of the world's greatest automotive brands.

The chrome pack consists of a polished towel rail, with chrome towel rail brackets and door hinges.

EVERHOT BY WESTIN COOKER HOOD

Complete your cooker with a hood that has been expertly matched to every single colour and size of Everhot cooker. The Everhot Cooker Hood by Westin is hand built in Britain. A precision-engineered extractor made from high grade stainless steel, featuring professional dishwasher safe filters and a large, vaulted fume catchment area. Its classic good looks are combined with modern efficiency to result in a stunning, powerful extraction hood that will stay with you and your kitchen for years to come.

EVERHOT ELECTRIC STOVES

*Colourful steel and cast iron room heaters
which simply plug into a 13amp socket*

For 45 years Everhot has led the way in innovative, energy efficient, heat storage cooker design now integrated into our unique stoves.

Hand built in the heart of the Cotswolds, Everhot electric stoves integrate our heat storage expertise into an elegant and efficient 1.5kW heater with cast iron door and beautifully crafted heat vent. Unlike a traditional wood burner or open fire, Everhot stoves do not require a flue and simply plug into a standard 13amp socket. Easy installation and classic design make them ideal for any space needing additional heat. A stunning focal point for living rooms, home and garden offices, conservatories and summer houses, annexes or even somewhere off the beaten track like a

shepherd's hut, narrowboat or campervan. As you would expect, Everhot stoves are British built for longevity and reliability. Along with their low peak load, they are ideal for use with solar panels as a solar dump where excess energy would otherwise be exported. Designed to be left on for longer periods of time, they are perfect for heating just one room of the house. Their clean, safe and easy-to-use design makes them ideally suited to holiday homes and guest rooms.

AVAILABLE IN TWO SPECIFICATIONS

EVERHOT ELECTRIC STOVE WITH 20 LITRE OVEN

The Everhot Electric Stove is a flawless blend of traditional good looks and modern efficiency, featuring our unique oven design. A 1.5kW thermostatically controlled heating element gently warms the room through our beautifully crafted heat vent. Behind the cast iron door you will find a 20 litre oven reaching up to 200°C and perfect for light meals, jacket potatoes and warming food through. Ideal for working from home without having to turn the central heating on or even leave the room for lunch! The quality engineered steel and cast iron heat storage construction will provide warmth long after the Stove has been turned off.

EVERHOT ELECTRIC HEATER WITHOUT OVEN

The Everhot Electric Heater brings warmth and a charming accent point to any room without the need for an oven. Its timeless design will emphasise an unused fireplace or bring character to the corner of a room. Shortly after turning on the Heater you will begin to feel heat coming through the top vent. After around half an hour, the main body will be up to temperature and radiating gentle heat into the room. Still featuring our heavyweight steel and cast iron build, but without an oven, the Electric Heater is slightly lighter than our Stove model and, with a fixed door, moving it from room to room as needed is easy.

DIMENSIONS

Small and refined yet big enough to provide warmth. Please note the cast iron door only opens on the stove.

Oven dimensions: 271.5mm W x 277.5mm H x 275mm D
*Stove Only

COLOURS

Both the Everhot electric Stove and the Heater are available in 20 beautiful colours, as well as Matt Black which is unique to our stoves and heaters.

Enabling you to complement any room in the house. See the full range on page 44.

Matt Black

WHAT OUR CUSTOMERS SAY

“The controllability of the Everhot and the fact that it actually boasts a grill makes our previous range look like a blunt instrument. When we think back to the vast amounts of fuel it used to burn compared with the Everhot’s miserly consumption we know we have made the right choice. Everybody who sees the Everhot loves it and can’t believe how reasonable it was to buy and how quick and easy to install.”

MRS C F, HARROGATE

“We’ve had our Everhot cooker for seven years: it’s everything we hoped for. It’s not just the centre of our kitchen, not even just of our house, but of our family. Of course we use it every day, throughout the day because we have the induction hob. But we congregate around it, just my wife and I, visitors and, of course, family. We can’t recommend Everhot enough and five stars seems insufficient!”

TRUSTPILOT REVIEW, 2024

“In the past we have used an Aga, and a Nobel cooker, and the Everhot in comparison is in a different league, in terms of its efficiency, convenience and installation. We are delighted with our Everhot and it is nice to know that we will be able to take the Everhot with us when we move, and will not end up having to install expensive flues or concrete bases.”

MRS S W, DORSET

If you would like to hear more from our Everhot customers, search for our Everhot discussion group on Facebook where we have a very active community of users. Trustpilot has a number of reviews and we love hearing from our customers.

COLOUR RANGE

Classic & Contemporary

Our cookers and stoves are available in a range of colour options and you'll find the perfect colour to complement any room.

The sumptuous Marine Blue, Forest Green and Burgundy remain enduring classics. Whilst the White, Cream and Sage provide softer, more subtle alternatives. Teal, Dusky Pink, Graphite and Dove Grey are recent contemporary additions. Whatever your colour choice, your Everhot will instantly take on the starring role in your kitchen.

*To ensure you choose the correct colour for your Everhot, samples are available on request.
We have reproduced these colours as accurately as printing will allow.*
