

# Montreal Built-in Fireplace

Style, quality and “hygge” - on your own terms

# Montreal - a Natural Favourite

Montreal offers a high-quality, stylish built-in fireplace option for those who prioritise design, safety, and quality.

## Local Production

The fireplaces are manufactured at our location in Vestbjerg. The casing is manufactured in durable 8mm steel, ensuring a long-lasting product.

The casing is powder-coated, there are custom-made glass holders added to the casing and the glass is manufactured by local suppliers in North Jutland.

## Design Options:

Montreal is available in the following designs: Open in front and back / Open in front / Open in front, back and on one side / Open in front and on one side.

## Burner Types:

All our burners, including our bio and hybrid models, are manufactured in-house. Three electronic burners are available: Denver F3, Denver F6 for bioethanol, and Hybrid Mist for demineralised water. The Denver F6 and Hybrid Mist models are controllable via the Decoflame App.

Our electronical fireplaces feature various safety sensors, including leakage and temperature sensors. Operating the fireplace is straightforward, either via the control panel or the included remote control. The Decoflame App, is available for Denver F6 and Hybrid Mist to both Android and Apple devices.

The built-in fireplace for those who prioritise a personal and individual solution.

Since Decoflame manufactures both casings and burners in-house, we can produce fireplaces that are 100% bespoke to any required project - large or small.

Decoflame manufactures with highest precision in millimeters and has an innovative team that assists with ideas and solutions according to your preferences. It could be anything from the dimensions of the casing or burner to a specific colour, choice of material, glass colour, etc.

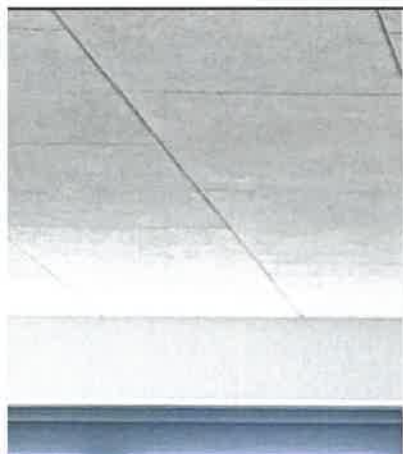

Narrow wall where a Montreal with a manual burner is built-in

#### Decoflame App

- »Regulate the flame or mist intensity
- »Monitor fuel consumption
- »Check remaining burning or vapour time
- »Monitor remaining fuel level
- »Turn the fireplace on and off
- »Set an automatic switch-off timer

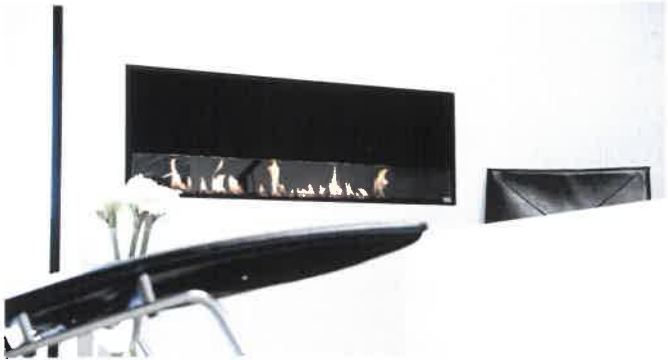

Customized Montreal with 2 tall and 1 short glass panels

# Decoflame

## **Innovative Design:**

Decoflame is recognised for its innovative designs that combine aesthetics and functionality. The result is high quality, unique and stylish fireplace solutions with a minimalist feel.

## **Safety Focus:**

Safety is our top priority, and we use advanced technology to ensure a seamless and reliable user experience. This makes our fireplaces particularly suitable for large construction projects.

## **Energy Efficiency:**

Decoflame's biofireplaces deliver not only visual appeal, but also warmth. A fact not everyone is aware of, but a small supplement to the primary source.

## **Recognition:**

Decoflame has garnered widespread recognition and acclaim, both domestically and internationally, establishing itself as a trusted and reputable partner, both locally and across borders.

## **Quality Materials:**

Decoflame deliberately selects and employs only premium quality materials, a critical decision when aiming for an extended product lifespan and superior performance.

## **Seamless Integration:**

Leveraging our extensive expertise accumulated over many years, we meticulously design customised solutions to ensure that the fireplaces seamlessly integrate into any project with ease.
