Milan LogicWood

Milan LogicWood brings the distinctive flame experience of LogicWood into a compact and highly adaptable fireplace created for modern urban living.

Its space-efficient proportions make it particularly suited to apartments, renovation projects and interiors where every square metre matters. Wall-mounted, placed freely within the room or integrated into furniture and architectural elements, Milan LogicWood makes it possible to introduce the atmosphere of real fire in places where a traditional fireplace solution may be difficult to accommodate.

The flexible design allows the fireplace to become part of an existing interior without dominating the space. A carefully curated selection of finishes and base options makes it possible to create anything from a discreet architectural expression to a warmer, furniture-like presence.

Designed to bring more atmosphere into less space, Milan LogicWood opens the experience of fire to a wider range of homes.

CHOOSE PLACEMENT

Milan LogicWood is designed to fit naturally into spaces where flexibility matters. Its compact format and multiple placement options make it easy to work with existing interiors, whether floor space is limited, a permanent built-in solution is not desired or the fireplace needs to become part of furniture or architecture.

Built into the wall, mounted above the floor or placed freely within the room, Milan LogicWood gives both homeowners and designers greater freedom to introduce fire without allowing the fireplace to dictate the interior. the fireplace to dictate the entire interior.

BUILT INTO THE WALL

For those who prefer a clean and integrated look, Milan LogicWood can be built into the wall to become part of the architecture itself. The fireplace blends naturally into the room, allowing materials, furniture and surrounding design elements to take centre stage while maintaining a calm and cohesive expression.

WALL-MOUNTED

Wall-mounted placement keeps valuable floor space free, making it particularly suited to apartments, smaller rooms and multifunctional interiors. The elevated position creates a light visual expression while allowing the fireplace to become a natural feature without taking up usable floor area.

FREESTANDING

Placed on the floor or on a piece of furniture, Milan LogicWood offers maximum flexibility in how the fireplace is introduced into the interior. It can be positioned where atmosphere is desired, incorporated into existing furnishings or used to create a new focal point, without the need to permanently integrate the fireplace into the architecture.

CHOOSE DETAILS

Small details can have a significant impact on the overall expression of a space. Milan LogicWood offers a choice of base options that subtly influence the fireplace's proportions and visual presence, allowing it to adapt to different interiors and personal preferences.

Combined with a curated selection of finishes, each configuration creates its own distinct character. Whether you prefer a lighter, more open appearance or a stronger, more grounded expression, Milan LogicWood can be tailored to suit your space.

OPEN BASE

A lighter and more elevated expression defines the Open Base, creating a sense of space beneath the fireplace. The open design emphasises clean lines and visual lightness, making it particularly suited to contemporary interiors where openness and simplicity are central to the overall aesthetic.

CLOSED BASE

A more substantial and grounded expression gives Milan LogicWood a stronger presence within the room. The solid base enhances its furniture-like character, making it a natural choice for interiors where materials, proportions and architectural balance take centre stage.

CHOOSE FINISH

Materials play a defining role in how a fireplace is experienced within a space. Milan LogicWood offers a carefully curated selection of finishes, each bringing its own character, texture and visual expression to the design.

Metal finishes can be applied to both the front panel and inner back wall, allowing for a cohesive appearance or subtle contrasts. Wood and fabric finishes are available exclusively for the front panel, introducing warmth, texture and individuality to the fireplace.

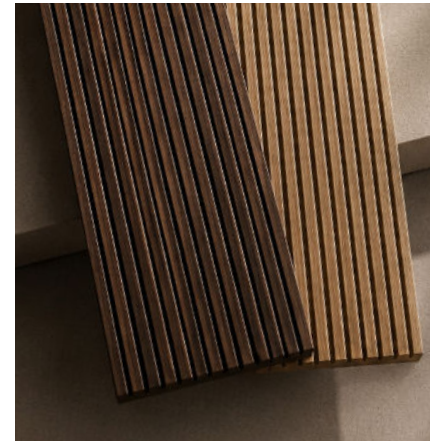

COPPER & BRASS

Copper and brass introduce depth, reflection and character to the design. Available in a range of surface treatments, these finishes interact beautifully with changing light throughout the day, creating an expression that feels both timeless and distinctive.

FABRIC

Soft textures and understated tones bring a calm, contemporary feel to Milan L. W.. The fabric front panels add visual warmth and tactile character, making them particularly suited to interiors where comfort and material richness are central to the design.

WOOD

Natural wood introduces warmth, depth and authenticity to the fireplace. The carefully crafted surface highlights the beauty of the material itself, creating a refined expression that connects effortlessly with both contemporary and classic interiors.

Mix & Match

Milan LogicWood is designed as a collection of carefully considered elements that can be combined to create a more personal expression. By mixing finishes across the front panel and inner back wall, the fireplace can be tailored to complement its surroundings or become a more distinctive design feature within the room.

Whether favouring subtle tonal combinations or stronger material contrasts, the flexibility to combine finishes allows Milan LogicWood to adapt naturally to different interiors, architectural styles and personal preferences.

The result is a fireplace that feels uniquely connected to the space it inhabits.
